**DETAILED ACTION**

1. Applicant's response to the office action filed on 06, January, 2007 is considered and acknowledged.

***Status***

2. Claims 9-14 are pending. All arguments have been thoroughly reviewed and deemed persuasive in part for the reasons that follow.

***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 9-14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 8-18 of U.S. Patent No. 7,125,691 ('691). Although the conflicting claims are not identical, they are not patentably distinct from each other because An obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but an examined application claim not is patentably distinct from the reference claim(s) because the examined claim is either anticipated by, or would have been obvious over, the reference claim(s). See e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed.Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225

USPQ 645 (Fed.Cir. 1985). Although the conflicting claims are not identical, they are not patentably distinct from each other because the claim 9-10 are generic to all that is recited in claims 8, 15-16 of the patent ('691). That is, the claims 8, 15-16 ('691) fall entirely within the scope of claim 10 or in other words, claim 9-10 are anticipated by the claims 8, 15-16 of the patent ('691). Specifically the method of steps (a) through (d) disclosing a method for absolute quantitation of a target nucleic acid relative to a reference nucleic acid comprising are within the scope of the claims 8, 15-16 of the patent ('691). Further the instant claims 11 is generic to all that is recited in the claims 9-10 of patent ('691), claims 12-14 are generic to all that is recited in claims 12-14, 17-18 of the patent ('691). Thus the instant claims encompass the claims in the patent ('691) and are related as genus and species, and are coextensive in scope.

The courts have stated that a genus is obvious in view of the teachings of a species. see Slayter, 276 F.2d 408, 411, 125 USPQ 345, 347 (CCPA 1960); and In re Gosteli, 872 F.2d 1008, 10 USPQ2d 1614 (Fed.Cir. 1989). Therefore the instantly claimed method is obvious over the claims in the patent ('691).

**Response to arguments:**

4. With regard to the objection to the specification, Applicants' amendment and arguments are fully considered and the objection is withdrawn herein in view of the amendment.
5. With regard to the rejection of claim 9 under 35 USC 112 second paragraph, Applicants' amendment and arguments are fully considered and the rejection is withdrawn herein in view of the amendment.

6. With regard to the rejection of claim 9 under 35 USC 103(a) as being obvious over Lowe et al. in view of Wittwer et al. Applicants' arguments are fully considered and the rejection is withdrawn herein in view of the persuasive arguments drawn to a calibrator sample.

7. With regard to the rejection of claims 7-8, 10-14 under provisional obviousness-type double patenting over claims 31-41 of the co-pending application 09/823,712 (now US pat 7, 125, 691), Applicants' arguments are fully considered and found persuasive in part. The cancellation of claims 7-8 rendered the rejection moot and with regard to the claims 10-14 the rejection will be maintained until a terminal disclaimer is submitted to overcome the rejection and the rejection is re-written herein to include the limitations of claim 9 as above.
